

LAKE TISZA ADVENTURE MAP

Man-made paradise

Lake Tisza is the area of the Hortobágy National Park and has been a UNESCO World Heritage Site since 1999. Protect nature! Watch out for Lake Tisza, don't litter! When hiking, take nothing but your memories and leave nothing but your footprints! Thank you!

WHY LAKE TISZA?

The Kiskörei Reservoir, now known as Lake Tisza, was built in 1973 and is the second largest lake in Hungary with an area of 127 km². The nearly 30 km long artificial lake was created for irrigation, flood protection and power generation. Today it is the most important ecotourism attraction of the area with rich fauna and flora. A piece of water paradise, offering a variety of experiences all year round for those who like nature and active recreation.

Lake Tisza was created by damming the river Tisza. The blonde river meanders across the artificial lake as it feeds the watersheds through 12 flushing canals. Hundreds of islands, wooded areas, inland lakes and canals have been created within the basins.

Each basin offers a different experience and opportunity. The Tiszavalki Basin is the shallowest (0.7 m on average) and the most protected, mainly visited by birdwatchers and canoeists. The Poroszlói Basin (1.3m) is a popular hiking and fishing destination with educational nature trails and backwaters. The wide water surface of the Sarudi Basin (1.5m) is ideal for water sports enthusiasts and beachgoers. The Abádszalóki Basin (2.5m) is a water sports paradise, and in the northern part of the romantic islands even an inner lake can be found. Another special area is the mortlake in Tiszafüred and Tiszaörvény, which is ideal for canoeing and SUP tours or waterfront relaxation.

ADVICE

The thousands of reed islands and floodplain swamps of the wildly romantic Lake Tisza are an ideal habitat for mosquitoes. Frogs' favorite food can be very uncomfortable for humans. In the morning and from the early evening until 10pm be prepared for the mosquito invasion. Protect yourself with a suitable mosquito repellent spray and wear long sleeves and trousers. Mosquito extermination does not only decimates mosquitoes, but also other useful insects, so the lake cannot be completely mosquito-free, as it would drastically interfere with natural cycles. When bathing, it is recommended to use swimming shoes due to a tiny prickly aquatic plant called water caltrop. The fruit of the protected plant is an anchor-shaped, chestnut-like formation with four needlelike tips. It will hurt if you step on it.

BICYCLE ROUTE OF THE YEAR 2021*

SMALL CIRCLE LENGTH 65 KM
GREAT CIRCLE LENGTH 90 KM
KISKÖRE BYPASS 4,5 KM

Uninterrupted bike path along the waterfront, full of exciting sights and activities! Lake Tisza can be divided into two cycling circles. The smaller one runs along the paved embankment around the lake. Between Tiszafüred and Poroszló there is a two-lane bicycle path with four bicycle bridges. The big circle is actually an extended version of the small circle, which also bypasses the Tiszavalki basin - with a ferry crossing at Tiszadorogma. Between Poroszló and Tiszavalk, the bicycle route was not paved. The Kisköre bypass (4,5 km) gives a glimpse into the downstream section of the watercourse and the ancient Tisza riverbed, where you can cross the blonde river on the Fairytale Bridge. Expect easy offroad trails, strong sunshine, and mosquitoes at sunset.

TIP: Shorten the small circle with the new bike ferry between Tiszaderzs and Dinnyeshát

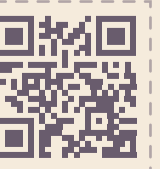

* The section between Tiszafüred and Poroszló of the Lake Tisza bicycle path won the title "Bicycle path of the year" in 2021.

ACTIVE RECREATION ON LAKE TISZA

Lake Tisza offers active recreation both on land and on water! In addition to cycling, you can rent a small motorboat, canoe, kayak or SUP to explore the reeds and canal labyrinths or large bodies of water. If you are not yet familiar with the canals of Lake Tisza, we recommend that you choose guided water tours, cruises and eco-tours, that are available in all 18 ports. The 7 open-water beaches of Lake Tisza provide safe, comfortable bathing, as the water gradually deepens and lifeguards take care of you everywhere.

ATTRACTIOnS

29 Horthy-Canal

The Tiszafüred irrigation main canal is a real industrial masterpiece, which has been giving life with the water of the Tisza through a nearly 80-kilometer canal system to the lands of the area since 1940. The only 320-meter-long aqueduct belongs to the Tiszavényi pump house. It is also called Horthy canal and can be visited free of charge. An internal visit requires prior registration.

Time required: 30 min., Access: bicycle, car

30 Tiszavirág Nature Trail

Crossing the river on Tiszavényi you can reach the Tiszavirág educational nature trail, where a 2 km long, fairy-tale-like walkway presents the wildlife of Lake Tisza. The road leads through a vast floodplain forest with four small bridges to reach a fishing hut, a „swampman" hut, a cable boat and two lookouts. At the end of the trip we can go boating on the black water of Göbe Lake. The nature trail can be reached from the port of Szabics.

szabicskikoto.hu, facebook.com/Tiszavirag

Time required: 2-3 hours, Access: boat, on foot

31 Kisköre Dam

It is the largest dam in the country (hydroelectric power plant, dam, sluice), the heart of the Lake, which not only generates electricity, but also regulates the water level of Lake Tisza and ensures navigability. The bike path leads directly through the dam, and provides a great view of the downstream water, that is also the segment of the river Tisza below Lake Tisza.

kolvizio.hu

Time required: 30 min., Access: bicycle, on foot, car

32 Kisköre Fish Pass

The largest ecological connection channel in Central Europe is the 1.371-meter-long fish sluice right next to the bike path. The stepped water flow, reminiscent of a mountain river, allows fish to pass from the downstream water to the water of Lake Tisza, which is on average six meters higher. You can

observe through glass windows the special sight of fish floating upwards. The fish sluice can be reached on foot or by bike.

Time required: half to 1 hour, Access: bicycle, on foot, car

33 300-year-old Tree

The oldest tree on Lake Tisza, a 300-year-old pedunculate oak, is located at the foot of the dam. 300 meters from the Kisköre road-railway bridge known as the "Fairy Tale Bridge". The girth of the protected tree is more than 18 meters. Legend has it that the couple who kisses each other under the tree will stay together forever. Give it a try!

kiskora.hu

Time required: half to 1 hour, Access: bicycle, car

34 Fairy Tale Bridge

The 780-meter bridge, handed over in 1889, was the longest bridge of the era and the second railway bridge on the Tisza. The bridge, which has been bombed and rebuilt three times is the only road-rail bridge in Hungary. The bridge, which passes at the height of the canopy of the floodplain forest, also offers a magical view of the original inverted dam of the Tisza, the Kisköre dam and the fish sluice. You can also ride across the bridge by bike, and you can stop safely at the small rest area in the middle. Pay close attention to car and rail traffic on the bridge!

Time required: half to 1 hour, Access: bicycle, car, train

35 Lábasház Lookout Tower

The highest lookout point on Lake Tisza is located along the cycle path in Kőre Harbor, in Kisköre. From the boat-shaped, 19-meter-high lookout, you can see the entire Abádszalók Basin and the Kisköre Dam. The pile houses under the lookout have a snack bar, and toilet facilities and the water police is located there. Kőre Port is also the base port for Holiday Boats.

Time required: half an hour, Access: bicycle, car, boat

36 Lake Tisza Water Promenade

In the Poroszló Basin, you can walk around the huge reed island on a 1.500-meter-long nature trail made of wooden planks. On the special promenade, next to an inner lake, you can also see a floodplain forest, and you can admire the romantic water world from small bird-watching hides. The nature trail can only be reached by boat from Fűrő Port. Professional tour guide is available upon request.

Time required: 1-2 hours, Access: boat

37 Tisza-tavi EcoCenter

The tourist visitor centre showcasing native animals offers an exciting programme. The huge complex presents the natural treasures and wildlife of Lake Tisza and the Tisza Valley with a spectacular, entertaining and interactive approach. You can find the largest freshwater aquarium in Europe here, with an underwater glass tunnel. A must see for everyone!

Time required: 2-3 hours, Access: bicycle, car, boat

38 Bird Sanctuary Tiszavalki Basin

As part of the Hortobágy National Park in the Tiszavalki Basin, there is a special and strictly protected bird reserve. Birds, which is also unique in Europe, can only be approached in water and only during certain periods. It is recommended to approach it from the ports of Tiszavalk, Tiszafüred and Poroszló with a guided tour.

39 Aranyosi Island

Of the hundreds of islands on Lake Tisza, the triangular-shaped Aranyosi Island is the largest, surrounded by the Tisza River. The island, overgrown with huge trees was artificially created. In the late 1970s, when the reservoir was built it was born by blasting a riverbed to make the area navigable. The deepest point of the Tisza is located in the upper bend of the island, with a depth of more than 20 meters.

Time required: half an hour, Access: boat

TIP

Try the new bike ferry!

Fancy a boat trip, but would you take your bike with you? Shorten your small cycle lap and try the new bike ferry between Tiszaderzs and Dinnyeshát. Ask about the timetable at the ports of the settlements.

20 Tiszahalász Monument

Until 1976, there was a village on the banks of the Tisza, which was completely destroyed by the largest flood up till then. Tiszahalász was surrounded by icy water, everyone had to flee. The hero of the village, Ede Harfí rescued the four hundred inhabitants of the village with his ferry, who later founded a new home called Újörincfalva. Today, a monument on the quiet island preserves the memory of the former fishing village.

Time required: half an hour, Access: csónak

41 Wooden Cave

The Tiszafüred Basin is an ideal area for shorter water trips. In the labyrinthine wild romantic canal system, smaller and larger lakes alternate, where rich wildlife and brilliant water flowers dazzle hikers. You can find on this area a 300-meter "Snake Canal", half of which leads through a forest. It is completely surrounded by trees, making it look like you are boating in a wooden cave. The jungle-like place is located on the left side of the flushing canal leading to the Tisza, which leads to the mortlake of Tiszavényi.

Time required: 1-2 hours, Access: boat

42 Bicycle Wavebridge

The Poroszló-Tiszafüred cycle path was handed over in 2020, and four bicycle bridges were built on this section. The longest of these, with a length of 308 meters, is a wavy symbolizing bridge on the Poroszló side. The bridges offer the Dutch-type, opening trap bridge on the Tiszafüred side. The special offer is an unparalleled view of the wildly romantic water world and the Tisza.

Time required: 10 mins, Access: bike, on foot

43 Bicycle-Road-Railway bridge

Three bridges cross the Tisza right next to each other. The predecessor of the railway bridge was built of wood by landowner György Józsa in 1834. The metal-structured railway bridge was handed over in 1923 and construction of the road bridge began in 1962. The youngest 290-meter bike bridge was handed over in 2020. This is how the past, present and future stand side by side.

Time required: 10 mins, Access: bike, on foot, car

44 45 46 Water lookouts

There are three new lookouts in the Poroszló Basin, which you can only reach by water. The Fattyszerkő lookout tower (44) is located on a small island in

the Csapói Dead Tisza, while the Bölömbika lookout tower (45) is hidden in Ravasz-hát on the water in a bay between the reed islands. The latest one, the lookout tower of Szilas-fok (46) was also built on the water along the Lapos-mortlake, at Szilas-fok. All three lookouts are 9 meters high, offering unparalleled views of the vast body of water studded with islands and small forests.

47 Dinnyeshát Lookout

One of the quietest beaches of Lake Tisza is called "Dream Beach" in Dinnyeshát. Next to the harbour, right on the banks of the River Tisza there is a small lookout tower, a romantic place for hikers. Divided by canals and small lakes, there is a hand-operated mini crossing ferry, a children's favourite. The bicycle ferry to Tiszaderzs also departs from here.

48 Tiszaigár Arboretum

The 20-hectare arboretum, which can be visited all year round, was founded in 1887 by landowner Péter Székely. The park is a nature reserve of national importance, where more than 400 species of trees and shrubs can be seen. The swamp oaks of Margaret Island also come from here. At the foot of the huge trees, descriptions and stories teach man to love nature.

Time required: 2-3 hours, Access: bicycle, car

49 Doll Museum

In this exciting village house, in the museum of dolls dressed in folk costumes, you can see an authentic, scaled-down copy of the clothes of more than 850 units from the countries of the Carpathian Basin and the Earth. In addition to the dolls we can learn about everyday objects and small crafts from the 18th century, such as the cooper's, ropemaking and lace-making crafts.
